**GuardForm — Your Strategic Partner**

We are a team of professionals who created the GuardForm brand as a coordinating company that unites the capabilities of Ukrainian and Chinese partners to fully meet customer needs. Our team has more than 20 years of experience in the production of military and tactical clothing, focusing on innovation and solutions tested on the battlefield.

TOP-TEX is the largest supplier of equipment for the Armed Forces of Ukraine and the police, and an official partner of 3M in Ukraine. In addition to supplies, TOP-TEX actively develops new models of equipment that undergo testing in real combat conditions.

TORNADO is a legendary manufacturing company with more than 30 years of history in the military clothing market. It is the holder of the 1991 brand and the official partner of Revision in Ukraine. TORNADO's products are widely used in the army and have proven their quality in combat.

Every year, these companies deliver hundreds of thousands of units of products, forming the foundation of trust in our brand.

Our Chinese partners complement GuardForm's potential in uniforms and footwear, as well as in the production of fabrics and accessories, relying on advanced technologies and large-scale manufacturing capacity.

GuardForm manages the entire production cycle for companies participating in international tenders: from design and planning to quality control and logistics. Our goal is to be a reliable subcontractor, taking responsibility for every stage and ensuring confidence in results.
